IntelliTICKET

Smart. Fast. Reliable.

IntelliTICKET™ from Datamaxx

Datamaxx Group, the industry leader in criminal justice, public safety and homeland security technology solutions, is pleased to bring you IntelliTICKET, the most advanced e-ticketing solution on the market today. With innovative features, including an industry-first payment collection module, customizable functions and compatibility with multiple platforms, IntelliTICKET is the ideal e-ticketing solution for both large and small agencies with limited budgets.

Is IntelliTICKET Right for You?

» Your agency is still handwriting tickets, and you want to save time and money while improving officer safety.

» You have an outdated e-ticket system and are looking to upgrade to a system with the latest citation and querying technology.

» You do not want to invest in new, expensive equipment and want an application that can run on multiple platforms.

» Your agency is losing revenue by not collecting on tickets.

The IntelliTICKET Advantage

Queries NCIC, Nlets, and State data sources	*Improve officer safety*
Auto-populated fields, scanning capability, drop-down menus and type-ahead features	*Increase productivity, save time and resources*

Integrates with existing DMV, RMS & Court systems	*Reduce data entry errors, processing times and costs*
Available on multiple platforms	*Integrate with existing hardware*
Low front-end costs	*Pay per ticket with affordable, subscription-based pricing option*

IntelliTICKET»

## Industry-First Payment Collection Module

IntelliTICKET features an on-site payment collection module that integrates with existing payment gateways. Officers can immediately accept payment for issued tickets. Datamaxx also offers an online payment add-on for agencies without existing online payment collection.

Affordable

Datamaxx offers a subscription-based "pay per ticket" model for IntelliTICKET to save you from expensive up-front costs. And, since IntelliTICKET is available on multiple operating systems, you choose the hardware that is best for your budget.

Query Capability

- Simultaneously queries person and vehicle information.
- Access NCIC, Nlets and State DMV data sources for real-time notification on alerts, warrants, stolen vehicles, etc.
- Safety is improved as officers no longer approach a vehicle without the necessary knowledge.

Simple and Fast

- Scan IDs to auto-populate query and ticketing fields.
- Drop-down menus, type-ahead functionality and auto-calculations, such as violation amounts, to ensure data accuracy.
- GPS integration allows for automatic location entry.
- Wireless printing to create professional, easy-to-read tickets in seconds.

Secure

- All Datamaxx solutions are compliant with FBI CJIS Security Policy including FIPS 140-2 validated encryption and Advanced Authentication.

Multiple Platforms

- Currently available for Windows and Android operating systems with iOS in development, which makes it the only e-ticketing solution that will be available on all three platforms.
- Integrated with your current MDT or run on the latest handheld devices.

Smart Features You Need

- Ticket data forms customizable to agency and state requirements.
- Signature capture of officers and violators as well as image and notes attachments.

Online Ticket Manager and Customized Reports

- Officers and administrators can easily print exact copies of tickets along with attached images and officer notes.
- Generate custom reports for auditing, analysis and productivity statistics.

24-7 Technical Support

- Outstanding customer support from domain and technology experts 24x7, 365-days-per-year.
